DESCRIPTORS: *Probability, Series.

Among the topics covered are the single law of chance, the psychology of gamblers, roulette series, law of variations, fallacies of probability, investigations of Bernoulli and Bertrand, negligible probabilities in life and science, approximate probabilities, the wager and auction concepts in probability, Poisson's law, consecutive series, probabilities of waiting, death, diseases, accidents, heredity, and similar matters. Appendices cover roulette, Poisson's formula and mortality tables. (From U. S. publisher's note)

Trans. of Zhur[nal] Fiz[icheskoi] Khim[i] (USSR) 1958,
v. 32 [no. 12] p. 2739-2747.

DESCRIPTORS: *Catalysts, Chemical reactions, Theory,
Metals, Oxides, Reaction kinetics.

In the course of a catalytic reaction, besides the
action of the catalyst on the reagents, there is always
an action on the reacting system on the catalyst
leading to changes in its composition and consequently
in its properties. To each composition of the reacting
mixture there corresponds a definite, steady state
composition of the catalyst depending upon the ratio of
the rates of interaction between the catalyst and the
